MPEG-4: THE IMPACT OF THE OPEN STANDARD ON THE FUTURE OF DIGITAL MEDIA

contents

- Main List of Figures iii
- Foreword iv
- Executive Summary vi
- Chapter 1 | What is MPEG-4?** 1
- A Brief History of MPEG** 2
 - Genesis 2
 - MPEG-1 2
 - MPEG-2 2
 - MPEG-3 2
 - MPEG-4 2
 - MPEG-7 2
 - MPEG-21 3
 - Table 1: MPEG Rectangular Video Compared 3
- MPEG-4 Delivery Timeline** 4
 - Table 2: MPEG-4 Delivery Timeline 4
- MPEG-4 Applications and Platforms** 5
- Chapter 2 | MPEG-4 Technical Architecture** 7
 - Systems 7
 - Stream Management Framework 7
 - Binary Format for Scenes (BIFS) 7
 - Intellectual Property Management and Protection (IPMP) 7
 - MPEG-J 8
 - File Format 8
 - Video 8
 - Compression Efficiency 8
 - Formats 8
 - Object Types 9
 - Table 3: Partial List of MPEG-4 Visual Object Types 9
 - Profiles 10
 - Table 4: Partial List of Visual Profiles 10
 - Audio 11
 - Synthetic/Natural Hybrid Coding (SNHC) 11
 - Delivery Multimedia Integration Framework (DMIF) 11

Digital Rights Management12

Chapter 3 | Early Adopter Considerations13

The Potential Benefits of a Universal Standard13

Potential Obstacles to Market Acceptance14

 The Standards Process Itself14

 Standards Forking14

 Fear, Uncertainty and Doubt (FUD)15

Chapter 4 | The Different Bodies Involved17

 MPEGLA17

 Internet Streaming Media Alliance (ISMA)17

 ITUT - International Telecommunications Standards18

 MPEG-4 Industry Forum (M4IF)18

 WMF: Wireless Multimedia Forum18

 X3D19

 3GPP/3GPP219

Chapter 5 | Licensing21

 The Patent Pool21

 Licensing Authorities21

Chapter 6 | Pricing for MPEG-4 Technology23

 Systems and Visual23

 Audio24

Chapter 7 | Survey: Perception Versus Reality27

 Table of Contents27

 List of Figures27

Chapter 8 | Survey: Vendor Products and Plans41

 Table of Contents41

 List of Figures43

Glossary of Terms84

Web Bibliography86

Legal Disclaimer87

Main List of Figures

List of Figures: Perception Versus Reality

Figure 1. Expected Uses of MPEG-4	29
Figure 2. Expected "Other" Uses of MPEG-4	30
Figure 3. MPEG-4 Usage Within Respondent Companies	30
Figure 4. Expected Date of Usage	31
Figure 5. Expected Encoder Choice	31
Figure 6. Reasons for Choice of Encoder	32
Figure 7. Respondents Who Have a List of Prospective Suppliers	32
Figure 8. Prospective MPEG-4 Encoder Vendors	33
Figure 9. Likelihood of Staying with Current Encoder Choice	33
Figure 10. Commitment to Encoder	34
Figure 11. Streams Served Per Minute (All Formats)	34
Figure 12. Streams That Will be Converted to MPEG-4	35
Figure 13. Importance of XML to MPEG-4 Users	35
Figure 14. Importance of Web3D to MPEG-4 Users	36
Figure 15. Importance of Other Technologies to MPEG-4	36
Figure 16. Will MPEG-4 Replace MPEG-2?	37
Figure 17. Costs Associated with MPEG-4	37
Figure 18. Extensibility of MPEG-4: Good or Bad?	38
Figure 19. Profile of Choice	38
Figure 20. Organization Membership	39
Figure 21. Organization Membership: How Many?	39
Figure 22. Importance of Interoperability Organizations to MPEG-4	39

List of Figures: Vendor Products and Plans

Figure 23. Encoder Distributors/Users	45
Figure 24. Business Focus for Encoder Distributors/Users	46
Figure 25. Type of MPEG-4 Encoder to be Used	46
Figure 26. Hardware Codec Usage	47
Figure 27. Software Codec Usage	47
Figure 28. Use of a Service for Encoding	47
Figure 29. Profiles to be Used	48
Figure 30. Target Customers for MPEG-4	48
Figure 31. Sales Channels	49
Figure 32. Expected Encoder Costs	49
Figure 33. Licensing Costs	50
Figure 34. Licensing Model Expectations	50
Figure 35. Encoder Interoperability Testing Plans	51
Figure 36. Support for Other Codecs	51
Figure 37. Schedule for Rollout	52
Figure 38. Server Usage Among M4IF Members	53
Figure 39. Business Focus for Servers	53
Figure 40. Server Type	54
Figure 41. Comparison of Codec Usage	54
Figure 42. Profile Levels to be Offered by Servers	55
Figure 43. Server Target Customers	55
Figure 44. Comparison of Server Target Markets	56
Figure 45. Server Sales Channels	56
Figure 46. MPEG-4 Server Price Ranges	57

Figure 47. Encoder/Server Cost Comparison	57
Figure 48. Server Licensing Expectations	58
Figure 49. Server Licensing Models	58
Figure 50. Server Interoperability Testing Plans	59
Figure 51. Comparison of Testing Plans	59
Figure 52. Server Support for Proprietary Codecs	60
Figure 53. Server Rollout Schedules	60
Figure 54. Comparisons of Rollout Dates	61
Figure 55. Player Involvement	61
Figure 56. Comparison of Groups	62
Figure 57. Business Focus of Player Group	62
Figure 58. Comparison of Business Focus	63
Figure 59. Player Codec Types	63
Figure 60. Player Profiles	64
Figure 61. Profile Comparisons	64
Figure 62. Player Target Customers	65
Figure 63. Sales Channels for Player Codecs	65
Figure 64. Player Costs	66
Figure 65. Player Licensing Costs	66
Figure 66. Licensing Plans for Players	67
Figure 67. Player Testing Plans	67
Figure 68. Player Rollout Schedule	68
Figure 69. DRM Usage Among M4IF and ISMA Members	69
Figure 70. Business Focus	69
Figure 71. DRM Components	70
Figure 72. DRM Use in Various Profiles	70
Figure 73. DRM Targeted Customers	71
Figure 74. DRM Sales Channels	71
Figure 75. DRM Costs	72
Figure 76. Licensing Plans for DRM	72
Figure 77. DRM Interoperability Testing	73
Figure 78. Support for Proprietary DRM	73
Figure 79. DRM Rollout Schedule	74
Figure 80. Authoring Tools – Usage/Deployment	75
Figure 81. Authoring Tools – Business Focus	75
Figure 82. Authoring Tools – Profile Support	76
Figure 83. Authoring Tools – Target Customers	76
Figure 84. Authoring Tools – Sales Channels	77
Figure 85. Authoring Tools – Pricing	77
Figure 86. Authoring Tools – Licensing Models	78
Figure 87. Authoring Tools – Interoperability Testing	78
Figure 88. Authoring Tools – Support for Other Codecs	79
Figure 89. Authoring Tools – Rollout Schedule	80
Figure 90. Patent Holders Ratio	81
Figure 91. Licensing Model Rollout Expectations	81
Figure 92. Time Frame for MPEG-4 to Become Streaming Standard	82
Figure 93. Time Frame for MPEG-4 to Become TV Standard	82
Figure 94. Enablers for MPEG-4	83
